

What exactly is Baxolve?

Baxolve™ is an innovative means of controlling back pain, using two clinically proven therapies, TENS and Lumbar Support, in one integrated belt. With Baxolve™ TENS and Lumbar Support can be used together for maximum pain relief or separately, as the situation requires.

About TENS

TENS (Transcutaneous Electrical Nerve Stimulation) is a clinically proven¹⁾, drug-free method of pain relief. It is extremely safe and has been widely used in the medical community for over 30 years.

About Lumbar Support

Lumbar support can be used to ease lower back pain and also to help prevent the onset of lower back pain. The Baxolve™ belt works by providing support to the spinal and abdominal muscles

Who Benefits from Baxolve™

80% of people suffer from back pain at some point in their lives and many millions are permanently plagued by the condition. Poor posture, degenerative diseases and injury can all contribute to back pain and like a vicious circle the inevitable pain often prevents us from exercising the spine and associated muscles which in turn exacerbates the problem. Baxolve™'s innovative design supports the spinal and abdominal muscles and at the same time relieves the pain, reducing the need for drug therapy and helping patients regain their mobility and quality of life.

BAXOLVE™ is a clinically proven therapy.

- + Drug free and self controlled
- + Incorporates clinically proven therapies ^{1) 2)}
- + Fully portable and easy to use
- + Provides rapid results
